RE: New gutter installation by Any Time Gutter & Screening, Inc.

To Whom It May Concern:

It is with true satisfaction that I highly recommend and endorse Any Time Gutter & Screening. After our roof was replaced in 2009, the roofing contractor replaced our old gutters as part of the roofing contract requirements. What a disaster! Due to the pitch of our roof and the positioning of the "drip shield", the roofing contractor attached the gutters too low below the roof edge. This resulted in water runoff overflow around the entire house... lawn wash-out and ruts in the lawn from the water run off... spillage off the roof in front of the doors... and literally waterfalls dumping buckets of water onto the sidewalk & driveway during heavy rains. We might as well have **not** had gutters on the house. Our roofing contractor refused to fix the problem and replace the gutters citing that it would void the roof warranty.

Art Kaufman and his team from Any Time Gutters fixed the problem completely. We have no leaks... no overflow... and beautiful gutters that compliment our home. Our new Any Time Gutters are color matched to our roof and the corner seams are perfect. In addition, Any Time Gutters relocated the downspouts for better water runoff around the foundation of the house. The installation crew was on-time, efficient, courteous, and their job site clean-up was excellent.

We could not be happier with the efficiency and look of our new gutters. And the pricing option offered by Any Time Gutters was an added incentive. It gave us real confidence that Any Time Gutters was willing to prove the value of their product and work before payment was required. I've not found any other contractor willing to put their business on the line like that.

Without reservation, we can whole heartedly recommend Any Time Gutters & Screening.

With high regards from a satisfied customer,

Dale & Monica Adams
